Feb 76

ABSTRACT

The United States Military Academy uses the Whole Man concept in the selection of candidates for admission. This concept encompasses three broad areas: scholastic, leadership potential, and physical condition and aptitude. The entrance scores for each of these areas are compared with previous classes. The American College Testing Program scores were used to admit 394 cadets to the Class of 1979. These scores are included and are shown with the previous three years in which the ACT scores were used. The College Board scores and other admission variables are shown for a ten year period.

NOTE: Any conclusions in this report are not to be construed as official U. S. Military Academy or Department of the Army positions unless so designated by other authorized documents.

DISTRIBUTION: This document is prepared for official purposes only. Its contents may not be reproduced or distributed (in whole or in part) without specific permission of the Superintendent, U. S. Military Academy, in each instance.

PREFACE

This report, along with the report, Characteristics of the Class of 1979, prepared in September 1975, and the report, New Cadets and Other College Freshmen, Class of 1979, to be prepared in the Spring of 1976, comprise the general reports prepared by the Office of the Director of Institutional Research to describe the Class of 1979 at the time members of the Class entered the Academy.

The same three reports were prepared for the Classes of 1971 through 1978. (For 1971 this report was called Analysis of the Characteristics of the Class of 1971, and for the Classes of 1972 and 1973 it was called Background and Predicted Success of Cadets in the Classes of ---- with Comparison with Previous Classes.) Similar reports are planned on each future class when it enters the Academy.

The following abbreviations are used in this report:

CEER	College Entrance Examination Scores and High School Rank scores statistically combined
HSR	High School Rank score
LPS	Leadership Potential Score
PAE	Physical Aptitude Examination
SAT-V	Scholastic Aptitude Test - Verbal
SAT-M	Scholastic Aptitude Test - Mathematics
WMS	Whole Man Score
ASR	Aptitude for the Service Rating
ACT-EN	American College Test - English
ACT-MA	American College Test - Mathematics
ACT-NA	American College Test - Natural Science
ACEER	A composite score of ACT tests and HSR

PERFORMANCE MEASURES

1. Academic Qualifications

a. The mean College Entrance Examination Board and American College Test scores for members of the Classes of 1979, 1978, and 1977 who were admitted by use of the respective scores are:

	<u>'79</u>	<u>'78</u>	<u>'77</u>
Scholastic Aptitude Test - Verbal	550	562	545
Scholastic Aptitude Test - Mathematics	629	635	616
American College Test - English	22.2	22.5	21.7
American College Test - Mathematics	28.9	29.5	28.7
American College Test - Natural Science	28.6	28.8	27.8
High School Rank Score	557	558	541

b. The Class of 1979 scores for SAT-V, SAT-M, and ACT-Math are significantly* lower than for the Class of 1978 but are higher than scores for the Class of 1977.

c. Comparisons with available data aid in interpreting the level of these scores. The mean cadet score for the Class of '79 on SAT-V is higher than that of 84% of a representative sample of male secondary school seniors. The mean cadet score on SAT-M was also higher than that of 84% of the secondary school seniors. The mean of 496,000 male secondary school college bound seniors in the 1974-1975 school year on SAT-V is 437 and on SAT-M is 495. The means of the American College Test scores were well above the national norms for men at 1218 colleges. The mean cadet score for the Class of '79 on ACT-English is higher than 81% of the men used in the national norm; the mean cadet ACT-Math is higher than 88% of those in the national norm; and the mean cadet ACT-Natural Science score is higher than 78% of those in the national norm.

d. The mean scores of the Scholastic Aptitude Test of all high school seniors, male and female, nationwide has shown a steady decline over the past twelve years; however, the loss of 10 points in SAT-Verbal and 8 points in SAT-Math this year is the sharpest drop in that period.

<u>College Class</u>	<u>Year Tested</u>	<u>Verbal</u>	<u>Mathematics</u>
Class of '68	1963-64	475	498
'69	1964-65	473	496
'70	1965-66	471	496
'71	1966-67	467	495
'72	1967-68	466	494
'73	1968-69	462	491
'74	1969-70	461	488
'75	1970-71	454	487
'76	1971-72	450	482
'77	1972-73	445	481
'78	1973-74	444	480
'79	1974-75	434	472

*Statistical significance referred to in this report is at the .05 level.

e. The College Entrance Examination Board, together with the Educational Testing Service, has appointed a special, outside "advisory panel" to assess the reasons for the dramatic drop in scores on S.A.T. among 1975 high-school graduates (Ref. page 10 of "The Chronicle of Higher Education" of 3 November 1975). Mr. Sidney P. Marland Jr., president of the College Board discounted what he said were several popular explanations for the decline in scores.

The drop was not caused by changes in the test that may have made it either too difficult or biased toward minority groups, he said. "Our research efforts to date convince us that there is nothing basically wrong with the way the test is constructed, administered, evaluated, and scored," he reported.

2. Potential for Success at USMA. Selection for admission is based on ability in three areas: academic aptitude, physical aptitude, and leadership potential.

a. Each candidate is evaluated either on his College Board scores (CEER) or his American College Test program scores (ACEER). If he has both, the higher of the two is used. Figure 1 provides a graphic comparison of the number of cadets within each CEER range as shown in Table 1, with the number of completely examined candidates within the same ranges. Figure 2 shows a similar comparison of candidates and cadets evaluated using ACEER scores.

b. General Potential for Physical Activities. The average Physical Aptitude Examination score of 553 is significantly higher than the average of 541 made by the entering Class of 1978. The number of entering cadets with PAE scores below 450, as reported in Table 1, decreased from 103 last year to 87 this year. A graphic comparison of the distribution of PAE scores in the Class of 1979 with that in the candidate population from which it was drawn is provided by Figure 3.

c. Leadership Potential. The Leadership Potential Scores are derived from the ratings of the candidate by his secondary school teachers and evaluations by admissions officials of his quality of participation in athletic and other school and community activities. The mean LPS for this Class (603) is significantly higher than the mean of the Class of 1978 (594). A graphic comparison of the distribution of Leadership Potential Scores in this Class with that in the candidate population is provided in Figure 4.

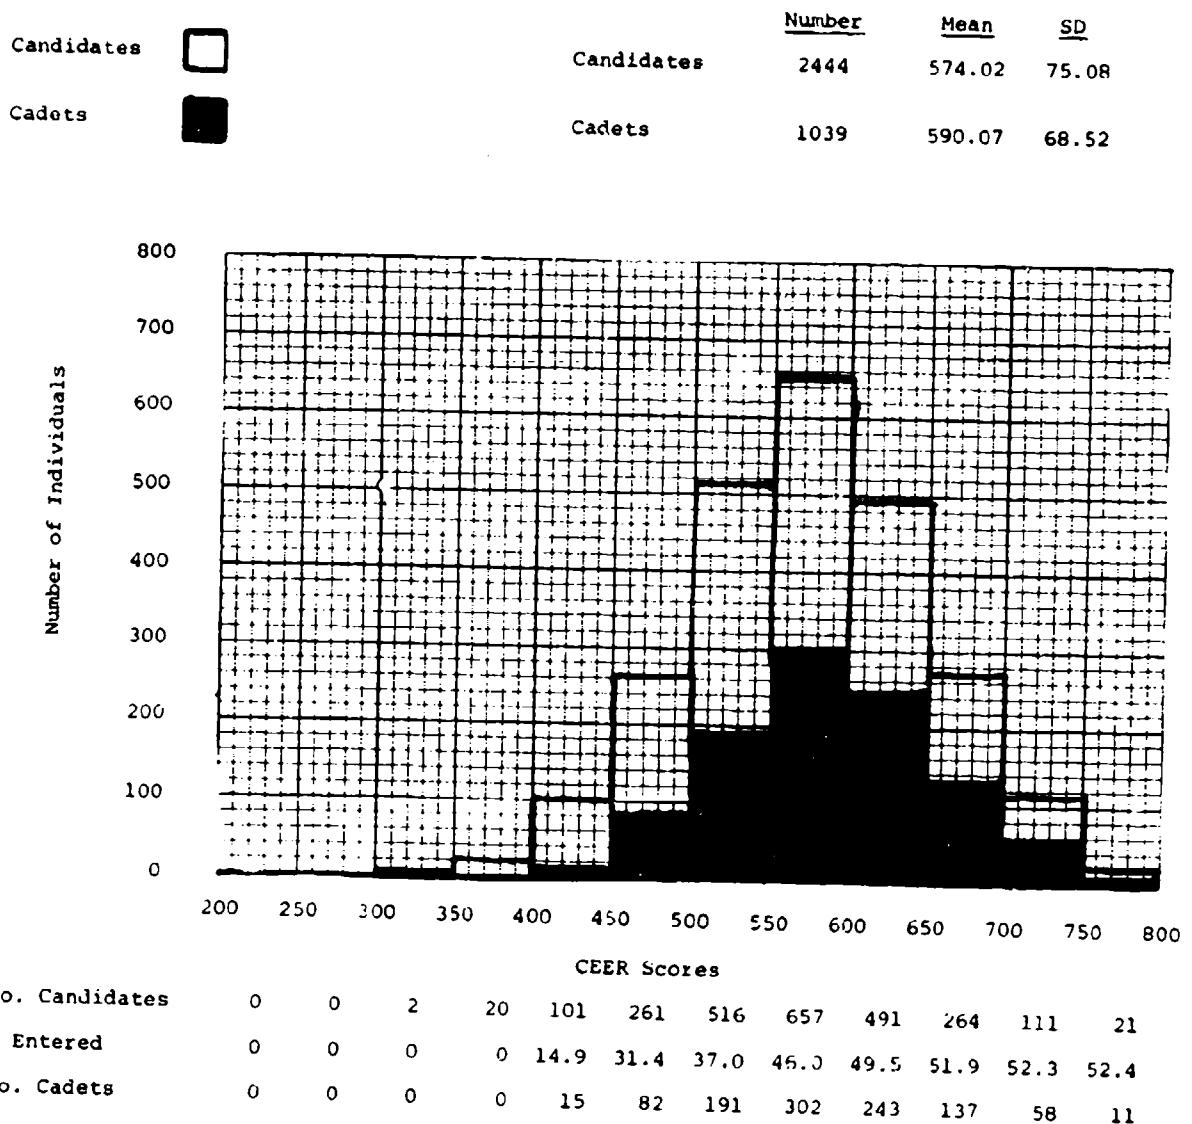

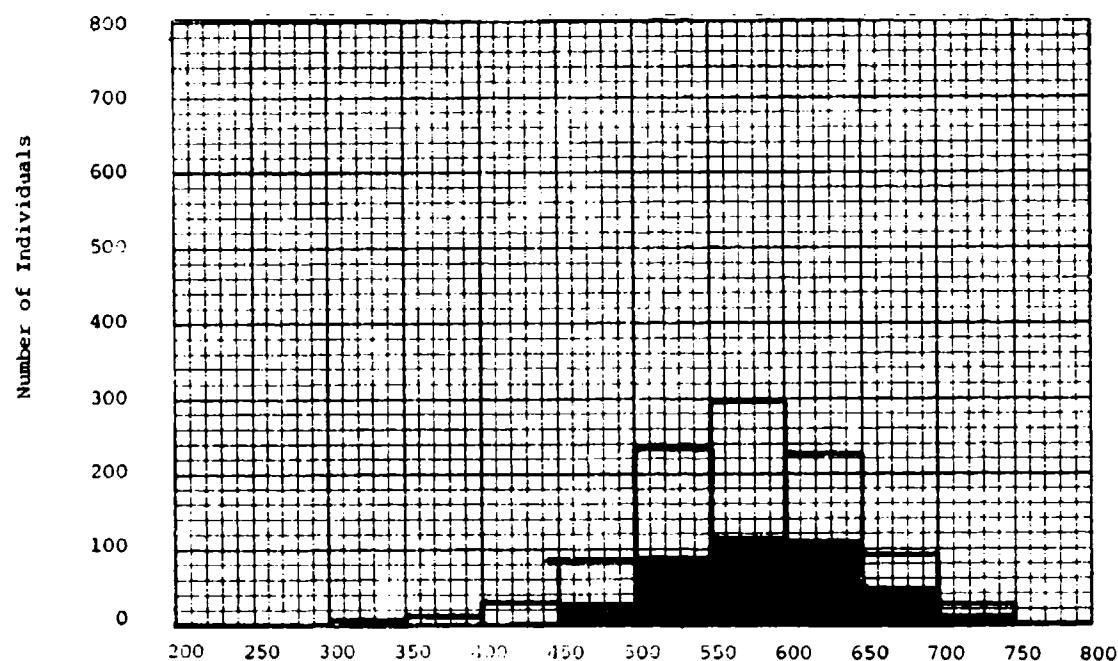

FIGURE 1. COMPARISON OF THE NUMBER OF CADETS (EVALUATED USING CEER) WITH THE NUMBER OF FULLY EXAMINED CANDIDATES (EVALUATED USING CEER) AT EACH CEER SCORE LEVEL FOR THE CLASS OF 1979.

FIGURE 4. COMPARISON OF THE NUMBER OF CADETS WITH THE NUMBER OF FULLY EXAMINED CANDIDATES AT EACH LEADERSHIP POTENTIAL LEVEL FOR THE CLASS OF 1979.

3. Overall Appraisal of Potential for Success at USMA

a. The Whole Man Score is a weighted score consisting of 60% CEER (or ACEER), 10% PAE, and 30% LPS. Table 2 shows the distribution of WMS's in the Class of '79. Moving the decimal point one place to the left converts the WMS to a scale similar to that of its components. Due solely to combining scores, the frequencies of the relatively high and low scores are reduced; i.e., the individuals with the highest scores on one variable do not necessarily have the highest scores on the others.

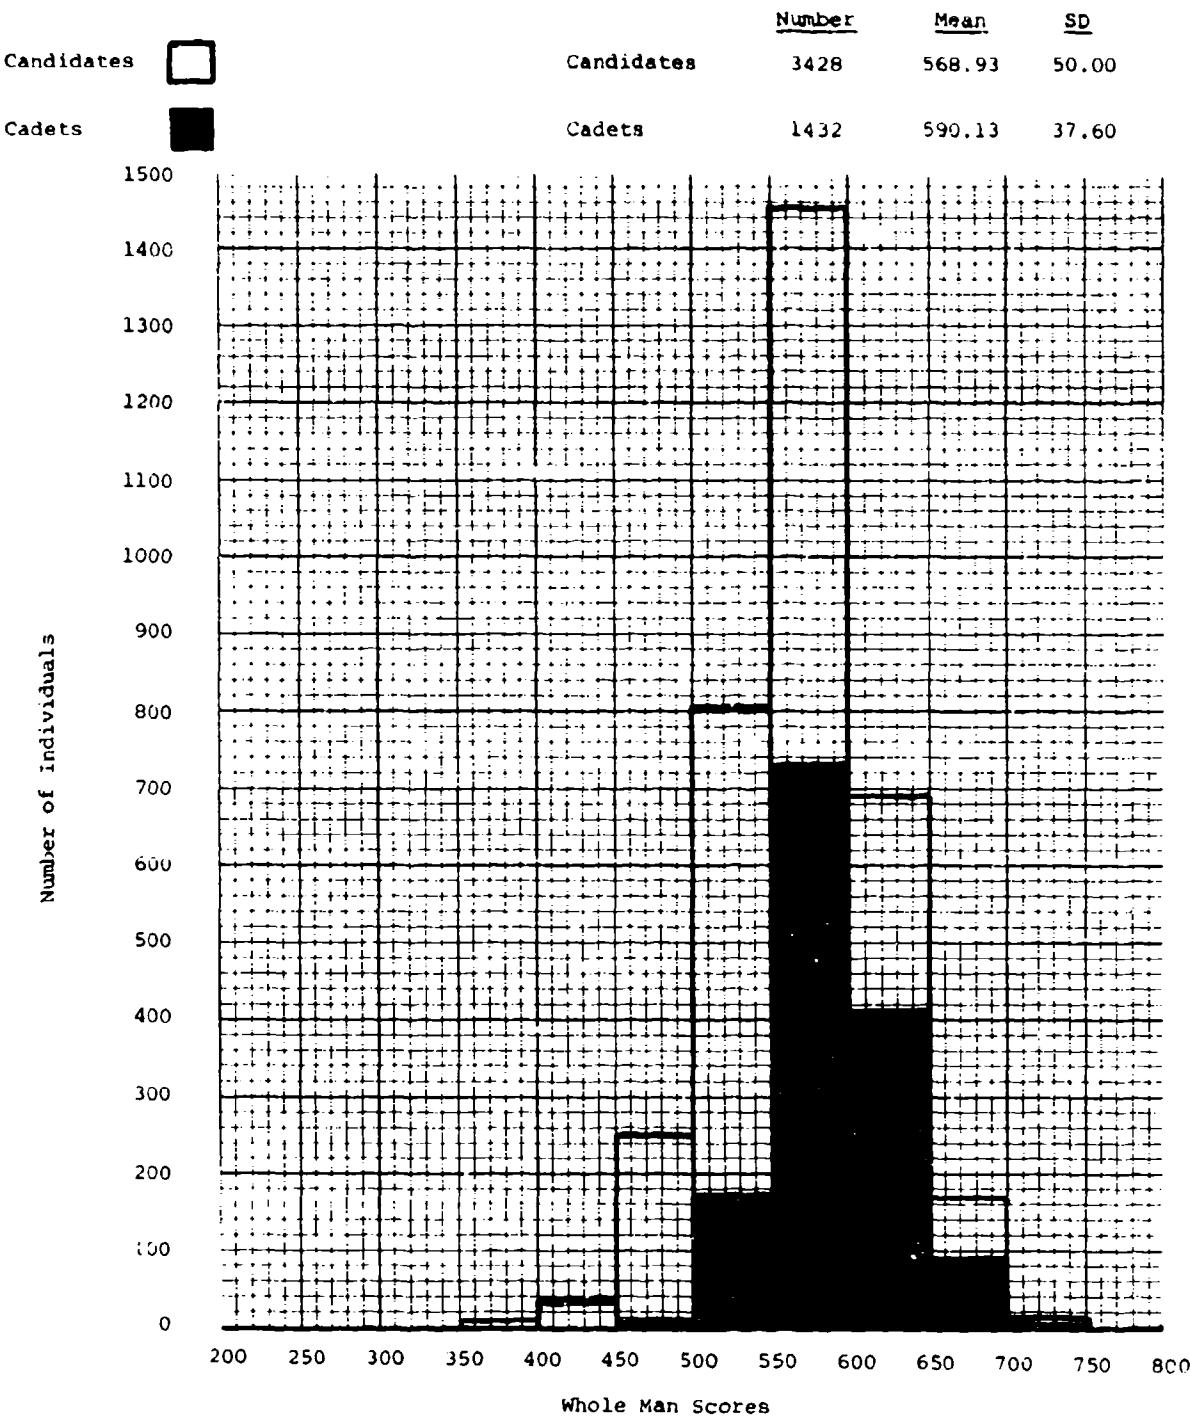

b. The mean WMS for the Class of 1979 is 5901.3, compared to 5901.5 for the Class of 1978. Graphic comparison of the number of cadets whose scores fall in each WMS range with the number of candidates whose scores fall within the same ranges is provided by Figure 5. The scores have been divided by ten in the figure for ease of comparison.

4. Trends in Admission Scores. Looking only at the Classes of 1979 and 1978 gives a very microscopic view of how well the Academy is attracting outstanding young men for admission. Therefore, trend data are provided for Classes of 1970 through 1979. See Tables 3 and 4 and Figures 6 through 12. These data* show that the academic measures have dropped off somewhat through the Class of 1977 and after a sharp rise for the Class of 1978, the scores for the Class of 1979 dropped, but are the second highest of any year in the past six. Table 5 shows the ACEER and the American College Test program scores. There were 284 cadets in the Class of 1976, 435 in the Class of 1977, 402 in the Class of 1978, and 394 in the Class of 1979 admitted using these scores. Table 6 shows selected characteristics of the entering cadets of the Classes of 1971 through 1979, and Table 7 shows high school activities and awards of cadets of these classes.

TABLE 2
DISTRIBUTION OF WHOLE MAN SCORES FOR THE CLASS OF 1979

Score Ranges	No.	%
7500-8000	0	0

SUMMARY

Over the ten year period from the entrance of the Class of '70 to the Class of '79, admission variables for the admitted classes show the following trends:

- a. CEER scores show a gradual decrease to the Class of '73, a fairly stable level to the Class of '76, a sharp increase for the Class of '78, and a drop for the Class of '79 which leaves the scores well above the Classes of '76 and '77.
- b. SAT-Verbal and SAT-Math scores show a similar pattern, with the Class of '79 having lower scores than the Class of '78 but higher scores than the Class of '77.
- c. The Whole Man Scores were quite stable for the Classes of '70 to '72; then, after a decline through the Class of '77, there was an increase for the Classes of '78 and '79.
- d. The Leadership Potential Score increased slightly for the Class of '79 but has been relatively constant over the 10 year period.
- e. The High School Rank score has been fairly constant for the last six years.

20. ABSTRACT (Continue on reverse side if necessary and identify by block number) The United States Military Academy uses the Whole Man concept in the selection of candidates for admission. This concept encompasses three broad areas: scholastic, leadership potential, and physical condition and aptitude. The entrance scores for each of these areas are compared with previous classes. The American College Testing Program scores were used to admit 394 cadets to the Class of 1979. These scores are included and are shown with the previous three years in which the ACT scores were used. The College Board scores and other admission variables are shown for a ten year period.
